

CoedePen Project

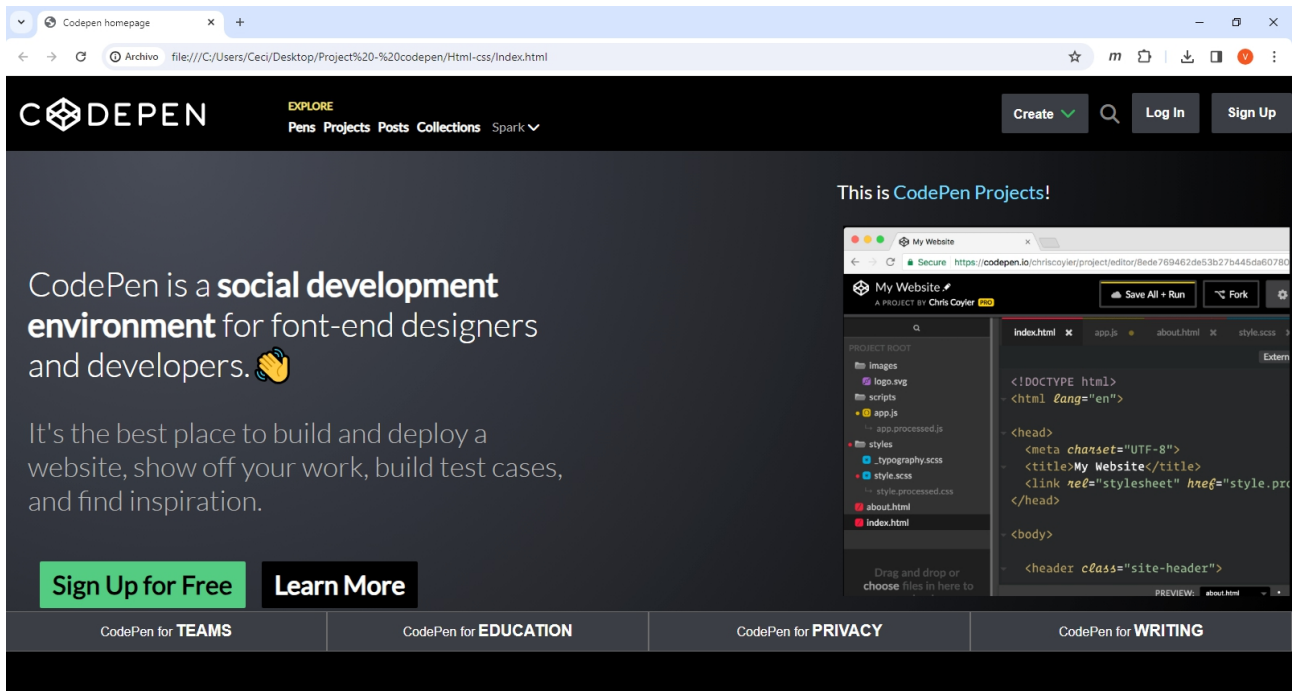

The aim of this project is to replicate the CodePen.io homepage using HTML and CSS. The following elements should be included:

- A navbar which includes "Pens, Projects, Posts, Collections, and Spark with a down chevron (does not need to drop down).
- Images (available tools can be used to replicate colors).
- Functionality features do not need to be replicated.

Expected Output

End result
1600 x 900 screen

2560 x 1440 screen
